 MSRP Per Piece: \$30.00

MG4-Moulding (Precast Conc. Coping for Veneer Stone/Brick)
 Comes in 32" Long Pieces
 MSRP Per Piece: \$15.00

SETTING THE PIECES

In most cases our products are set on brown coat of stucco using premium quality white thin-set cement mortar and are reinforced with mechanical attachment such as galvanized/ stainless steel screws. Each piece has an embedded metal bracket that have hole for the screws.

If your stucco is already finished with final (color) coat, The surface of the stucco must be scraped off where the molding is going to be installed. The mortar must bond to the surface well. In this case, the embedded brackets cannot be used. Therefore, instead of the brackets, screws must be put through the pieces. (First, drill a hole, then put the screws)

FIELD CUTTING

Almost in all cases field cutting is required during installation. Joint placements should be considered prior to cutting. Our products may be cut using masonry blades preferably diamond blade. (Dry/Wet Cut) In most cases, four or seven inch diamond blades will do the job.

CLEAN UP

Care should be taken during installation. Mortar spills should be cleaned immediately using water. You may also clean the precast using soap & water. Other masonry cleaners are available at specialty stores.

MATERIAL LIST

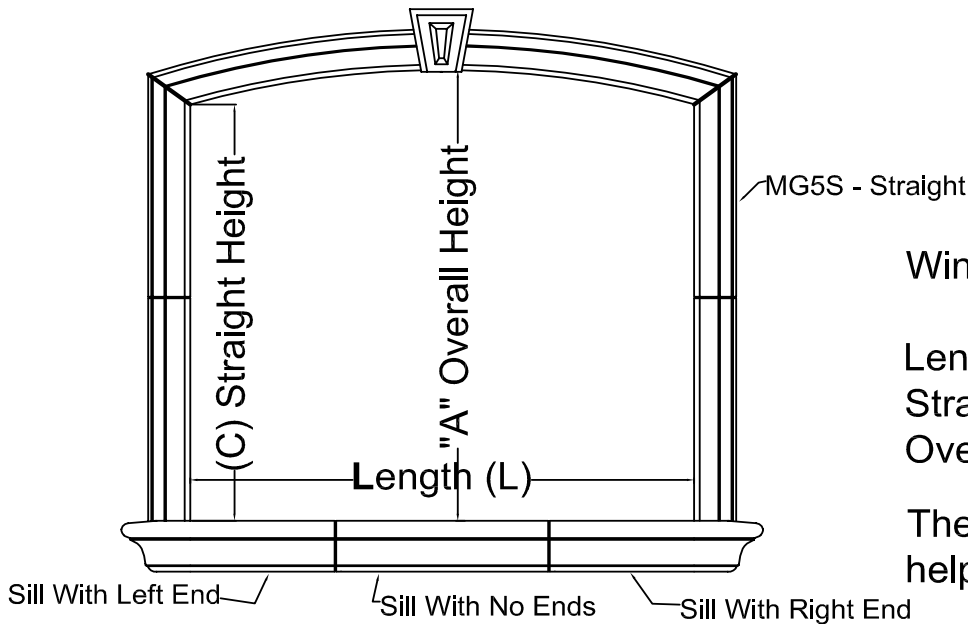

- Premium quality white thin-set mortar
- Screws (Galvanized/ Stainless Steel)
- Grout for joints

EQUIPMENT / TOOLS LIST

- Drill
- Cutting Saw (4" / 7" masonry blade)
- Level
- Mortar Mixer
- Measuring Tape
- Grout Bag
- Pencil

ABOVE INSTALLATION GUIDES ARE NOT WARRANTIES. IT IS THE CONTRACTORS OR INSTALLERS RESPONSIBILITY TO ASSURE ALL ITEMS ARE INSTALLED PROPERLY.

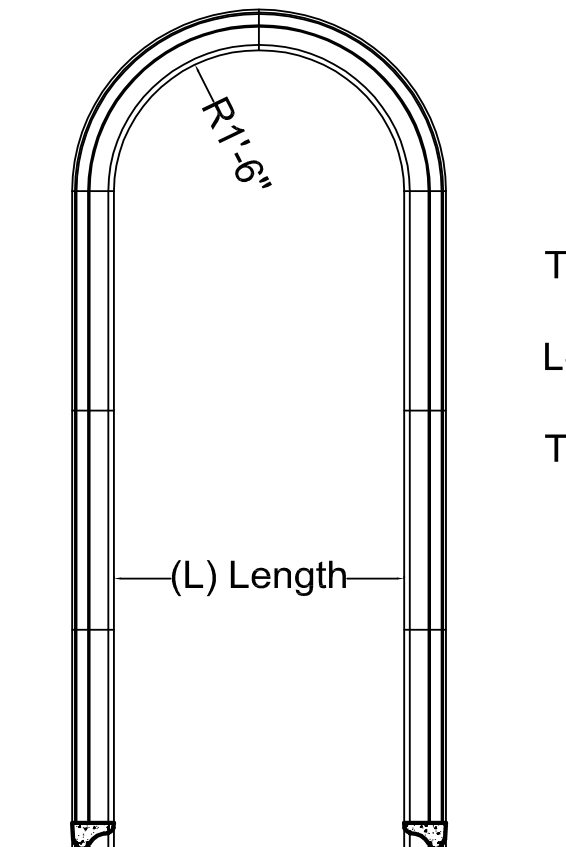

We make the moulding same radius as your door/window. We need the actual radius or diameter to be able to make the radius. The Worksheet below will help determining the radius.

Window Type: Eyebrow

Length (L): _____
 Straight Height (C): _____
 Overall Height (A): _____

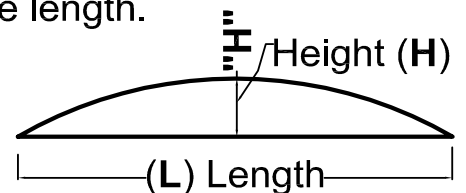

The measurements above will help us determine the radius.

Type: Door Full Arch (half circle)

Length (L): _____

The radius is half of the length.

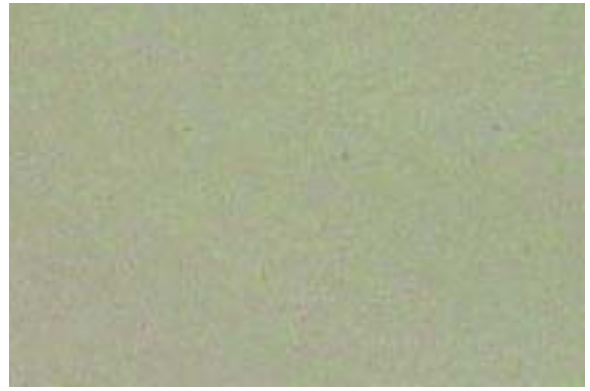

Height (H): _____
 Length (L): _____

An arc of a circle. The above measurement will help us determine the radius.

AVAILABLE IN FOUR NATURAL EARTH TONE COLORS

BUFF

SEQUOIA BROWN

STONE WHITE

TAN

The above colors are graphic representation, the printing process may not accurately reflect product color. We strongly recommend that you see an actual sample prior to ordering.
